Web Framework

Components

survey.qmd

A **Quarto doc** defining the main survey content (pages, text, images, questions, etc).

app.R

An **R script** defining the survey Shiny app. It sets up the database and server, and launches the survey.

Database Setup

We recommend using **Supabase** or any **PostgreSQL**
database for the database setup.

app.R

```r
1  # Load Package
2  library(surveydown)
3
4  # Database Credentials
5  sd_db_config()
6
7  # Connect to Database
8  db <- sd_db_connect()
9
10 # Server Setup
11 server <- function(input, output, session) {
12
13   # Skip logic
14   sd_skip_forward(...)
15
16   # Conditional display
17   sd_show_if(...)
18
19   # Server settings
20   sd_server(
21     db = db,
22     ...
23   )
24 }
25
26 # Launch Survey
27 shiny::shinyApp(ui = sd_ui(), server = server)
```

Server Setup
